linkedin.com/in/sawan-mukhiya | github.com/Sawan-Mukhiya

Motivated and detail-oriented developer seeking an AI/ML internship. Strong foundation in programming, data analysis, and machine learning, with hands-on experience in building models, handling datasets, and applying supervised learning techniques. Skilled in model evaluation, data preprocessing, workflow automation, and practical exposure to computer vision, natural language processing, and Django REST API development. Passionate about leveraging Python and AI frameworks to solve real-world problems and gain practical industry experience through an internship opportunity.

PROFESSIONAL SKILLS

- Machine Learning & AI Concepts (supervised learning, optimization, evaluation metrics)
- Agentic AI frameworks & workflow orchestration
- Computer Vision (image processing, detection, classification)
- Natural Language Processing (text classification, embeddings, LLMs)
- Data Preprocessing & Feature Engineering

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, PHP, C, HTML, CSS

Libraries: NumPy, Pandas, Matplotlib, Seaborn, Scikit learn, PyTorch, OpenCV, Pillow, Playwright

Frameworks: Django REST Framework, React.js

Databases: MySQL, SQLite, MongoDB, Microsoft SQL Server

Tools: Git, GitHub, Docker, n8n Automation, Jupyter Notebook

PROJECTS

SnipTxt: An OCR Platform using CRNN with CTC – Django REST Framework, React.js, MySQL, PyTorch

- Built a web OCR system using CNN + BiLSTM + CTC for text recognition.
- Designed modular APIs and integrated Django backend with SQL database [\[GitHub\]](#).

Hands On Machine Learning – Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn

- Implemented various machine learning algorithms and concepts using Scikit-learn and Python.
- Emphasizing on supervised learning, model evaluation, and practical applications [\[GitHub\]](#).

Garment Employee Productivity Prediction – Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, XGBoost

- Performed EDA to understand productivity patterns and feature relationships in garment worker data.
- Built & evaluated regression models using Scikit-learn, achieving high predictive accuracy ($R^2 \approx 0.94$) [\[GitHub\]](#).

Web-Scraping – UV, Playwright

- Built a scraper to extract top 5 entertainment articles and daily cartoon from ekantipur.com.
- Automated navigation and data extraction with Playwright, saving results in structured JSON format [\[GitHub\]](#).

NEPSE Stock Journal & Tax Calculator – Django REST Framework, React.js, MySQL

- Developed a stock journal with tax/fee calculations and portfolio analytics.
- Implemented backend APIs and reporting features for financial insights [\[GitHub\]](#).

EDUCATION

Bachelor in Computer Application
National College of Computer Studies

Paknajol, Kathmandu
Dec 2022 - Present

2 in Management (Computer Science)
Bijeswori Secondary School

Bijeswori, Kathmandu
May 2020 - 2022
